ISAIAH S. LANG,
PARKER M. TOWN,
JESSE M. YOUNG,

Auditors.

REPORT OF SCHOOL COMMITTEE.

Your Committee having attended to his duties according to law, would submit the following report :

DISTRICT NO. 1.

Summer Term. Teacher, Miss Ida A. Butler. Wages of teacher per month, \$28.00 ; length of school, 10 weeks ; whole number of pupils, 27 ; average attendance, 21.

This school was quite irregular in attendance, which somewhat marred the success of the teacher, and the absence of some of the best scholars on examination affected the general appearance of the school. Singing was one pleasing feature of the exercises, which with object lessons and gymnastics, added much to the interest of the scholars.

Winter Term. Lane, teacher. Wages per month, \$30.00 ; length of school, 10 weeks ; number of pupils, 32 ; average attendance, 25.

We think the school made better progress than the preceding term

DISTRICT NO. 2.

Summer term, teacher, Miss Addie S. Lang. Wages of teacher per month, \$20.00 ; length of school, 10 weeks : number of pupils, 12 ; average attendance, $9\frac{1}{4}$.

Winter Term. Same teacher. Wages per month, \$20.00 ; length of school, 10 weeks ; number of pupils, 14 ; average attendance, $10\frac{3}{4}$.

This school is composed mostly of large scholars, and requires skillful management. The order was fair, and the closing examination showed that progress had been made in the studies pursued.

DISTRICT NO. 3.

Summer Term. Teacher, Mrs. M. J. Dolber. Wages per month, \$28.00 ; length of school, 9 weeks ; number of pupils, 23 ; average attendance, 20.

The order of this school, which, at the beginning of the term was not the best, was, under the management of Mrs. D——, much improved. At our second visit a marked change was noticeable in the appearance of the school, both in order and progress in study.

Winter Term. Teacher, Miss Clara A. Rowe ; wages per month, \$26.00 ; length of school, 15 weeks ; number of pupils, 22 ; average attendance, 19.

Miss Rowe taught a good school, satisfactory both to the district and the committee.

DISTRICT NO. 4.

Summer Term. Teacher, Miss Mary A. Crane. Wages of teacher, \$23.00 : length of school, 8 weeks ; number of pupils, 31 ; average attendance, 28 $\frac{1}{2}$.

Winter Term. Same teacher. Length of school, 9 weeks ; number of pupils, 30.

This is one of the best schools in town. The order was excellent ; the recitations were prompt ; the progress commendable. Both teacher and scholars strove for a good school and they got it. No 4 is a *model* district.

DISTRICT NO. 5.

Summer Term. Teacher, Miss Ella F. Hanson of Auburn. Wages of teacher per month, \$22.00 ; length of school, 8 weeks ; number of pupils, 18 ; average attendance, 16.

Winter Term. Same Teacher. Wages per month, \$22.00 ; length of school, 10 weeks ; number of pupils, 20 ; average attendance, 18.

Miss Hanson is an experienced teacher. She is perfectly at home in the school room, and knows how to govern. The

school made excellent progress during both terms. The classes in arithmetic made a fine appearance at the closing examination. Better progress was made in this branch of study than in any other school in town. It was a *good school*.

DISTRICT NO. 6.

Summer Term Teacher, Miss Lizzie E. Crane. Wages per month, \$18.00; length of school, 10 weeks; number of pupils, 16; average attendance, 14.

The order was good, and the progress satisfactory.

Winter Term. Teacher, Miss Allie J. Putnam of Hooksett. Wages per month, \$21.00; length of school, 8 weeks; number of pupils, 17; average attendance, 16.

Miss Putnam was not a stranger to this district, and she succeeded in gaining the love of all her pupils. The closing examination showed that both teacher and scholars had been diligent.

DISTRICT NO. 7.

Summer Term. Teacher, Miss Emma C. Healey. Wages per month, \$18.00; length of school, 8 weeks; number of pupils, 10; average attendance, $9\frac{1}{2}$.

Winter Term. Same teacher. Wages per month, \$19.00; length of school, 9 weeks; number of scholars, 10; average attendance, $7\frac{3}{4}$.

The house in this district is well ventilated, both from above and below; and it has "room for many more." The scholars from their distance apart have learned to speak loud. The reading classes made a good appearance. The scholars certainly deserve a better tabernacle.

DISTRICT NO. 8.

Summer Term. Teacher, Miss Fannie M. Emerson. Wages per month, not including board, \$12.00; length of school, 11 weeks; number of pupils, 13; average attendance, 11.

This was Miss Emerson's first attempt at teaching, but under her management the school made commendable progress.

Winter Term. Teacher, Miss Ella F. Hanson. Wages per

month, \$26.00 ; length of school, 11 weeks ; number of pupils, 15 ; average attendance, 14.

The district was fortunate in securing the services of Miss Hanson, as in No. 5. The greatest progress in studies was in arithmetic. Master Robbins can hardly be excelled in this study. The reading classes were good.

DISTRICT NO. 9.

Summer Term. Teacher, Miss Lulie Dolber. Wages per month, \$24.00 ; length of school, 10 weeks ; number of pupils, 34 ; average attendance, 29.

Winter Term. Same teacher. Wages per month,—— ; length of school, 11 weeks ; number of pupils, 36 ; average attendance, 27.

This is the largest school in town, and one of the most difficult to manage. We think for the winter term an older teacher would have succeeded better. Miss Dolber, however, kept a good school, and labored hard to keep it in a good condition. The attendance of this school was very poor, which was a serious drawback to its progress. Parents are at fault for keeping their scholars from schools, when the distance is so small.

DISTRICT NO. 10.

Summer Term. Teacher, Miss Nellie Sanborn. Wages per month, \$15.00 ; length of school, 10 weeks ; number of pupils, 24 ; average attendance, 19 $\frac{3}{4}$.

This was Miss Sanborn's first school. She was amply qualified to instruct in this district, but failed in *order*. She found it in a bad condition, and was not able to restore it to a healthy state. In some other school she might have succeeded well. Some of the scholars were absent on examination day, much to the discomfort of the teacher.

Winter Term. Teacher, Miss Alla A. Norris of Epping. Wages per month, \$26.00 ; length of school, 8 weeks ; number of pupils, 24 ; average attendance, 21.

Miss Norris has had experience in teaching, and was the right person in the right place. Through her management good order was preserved, and the closing examination indicated that good progress had been made in the studies pursued.

DISTRICT NO. 11.

Summer Term. Teacher, Mrs. M. J. Dolber. Wages per month, \$23.00 ; length of school, 8 weeks ; number of pupils, 22 ; average attendance, 17.

Winter Term. Same teacher. Wages per month, \$24.00 ; length of school, 8 weeks ; number of pupils, 22 ; average attendance, 20.

Mrs. Dolber's long experience in teaching rendered her services valuable to this district. The examination was very interesting. The geography class especially did themselves great credit, and the speaking by the little ones was very pleasing. It was a good school.

DISTRICT NO. 12.

Summer Term. Teacher, Mrs. Mary E. Nutting. Wages per month, \$16.00 ; length of school, 10 weeks ; number of pupils, 15 ; average attendance, $12\frac{1}{2}$.

Winter Term. Same teacher. Wages per month, \$16.00 ; length of school not stated in register ; number of pupils, 18 ; average attendance, 12.

This is rather a backward school, yet there are some good readers in it. Mrs. Nutting did *her* part to advance the school and with quite good success. Much patience is needed in this school.

DISTRICT NO. 13.

Fall Term. Teacher, Miss Lizzie E. Crane. Length of school, $12\frac{2}{3}$ weeks ; wages per month, 19.40 ; number of pupils, 21 ; average attendance, 18.

There was only one term in this district. The order was good, and the recitations well committed. The recitations in history were well performed.

DISTRICT NO. 14.

Summer Term. Teacher, Miss Abbie L. Page. Wages per month, \$16.00 ; length of school, 6 weeks ; number of pupils 6 ; average attendance, $5\frac{1}{2}$.

Winter Term. Same teacher. Wages per month, \$16.00 ; length of school, 8 weeks ; number of pupils, 10 ; average attendance, $7\frac{5}{8}$. *Any* teacher can manage this school. Miss Page showed herself mistress of the situation, and proved by her patience and self-possession, her ability to keep a larger school.

REMARKS.

DISTRICTS.—There are too many districts in town. Ten would be far better than fourteen. The schools would be larger and more prosperous. This is an evil which possibly at present cannot be remedied.

SCHOOL HOUSES.—Most are in a good condition. No. 7 still stands, a relic of by-gone days. Old Time will soon make the erection of a new house necessary. Repairs are out of place. Some of the houses have too little blackboard. But few are furnished with outline maps. Teachers might awaken an interest in the district toward securing them.

A school house cannot be made too attractive. White walls, a good set of maps, adequate amount of blackboard, and pleasant surroundings all tend to enhance the progress and prosperity of a school.

TEACHERS.—Prudential Committees should seek the best teachers, regardless of cost. Cheap teachers are a damage to many schools. New beginners must commence somewhere, but they are not adapted to every school. Better have *good* teachers fitted for their school and pay for them. Culture is more valuable than money, and a well disciplined mind more precious than gold and silver.

TEXT BOOKS.—There are too many of them. In some schools there are two or three kinds of geographies and grammars. This variety of books makes more classes and mars the progress of the school.

PARENTS.—Parents can help a school in various ways. They can aid it by being often present at its exercises, and especially, examination. Too few attend the closing exercises of the school.

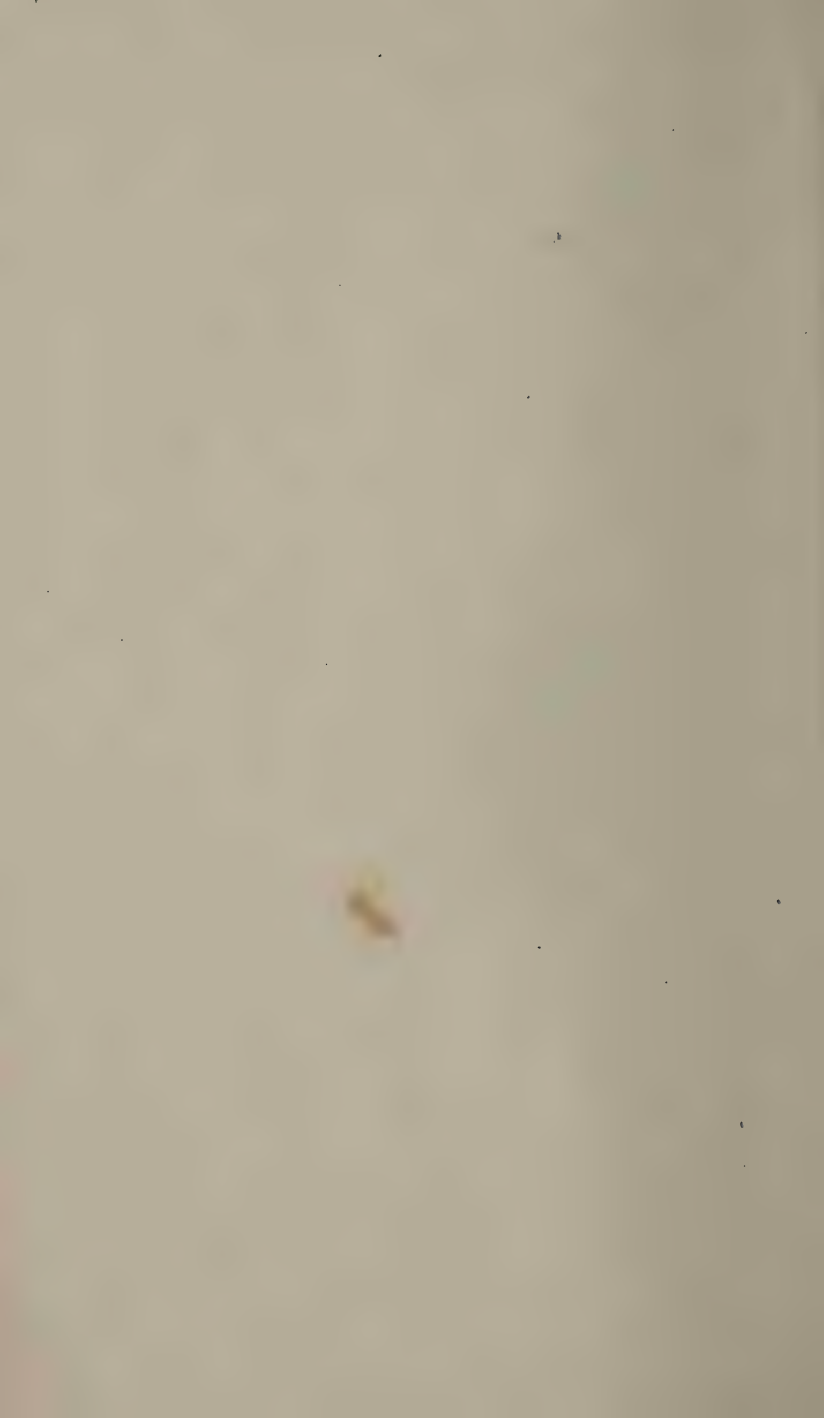

They can aid it by *promoting regular* attendance. Parents should insist upon their children attending school punctually, and should never allow them to be absent at examination. It brings great discomfort to the teacher to have any of the scholars absent. The committee cannot gain a true estimate of the condition of the school.

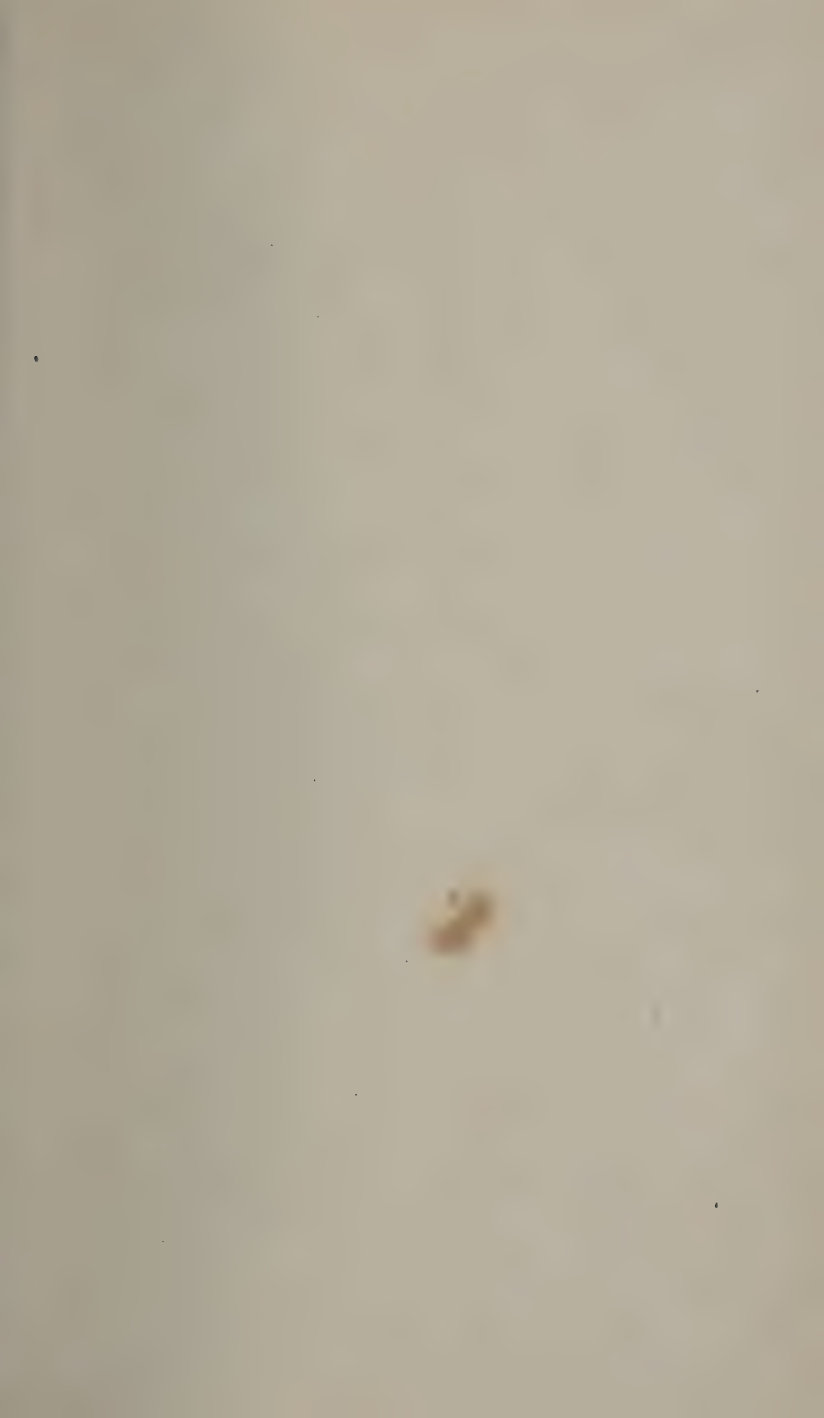

Parents can aid the progress by being in harmony with one another. A divided district has much to do with the failure of a school. No. 4 has always been a success, and the district is always a unit in action. Every parent should feel himself responsible for the success or failure of a school. Never should he side with his child against the teacher, but rather seek to heal the difficulty.

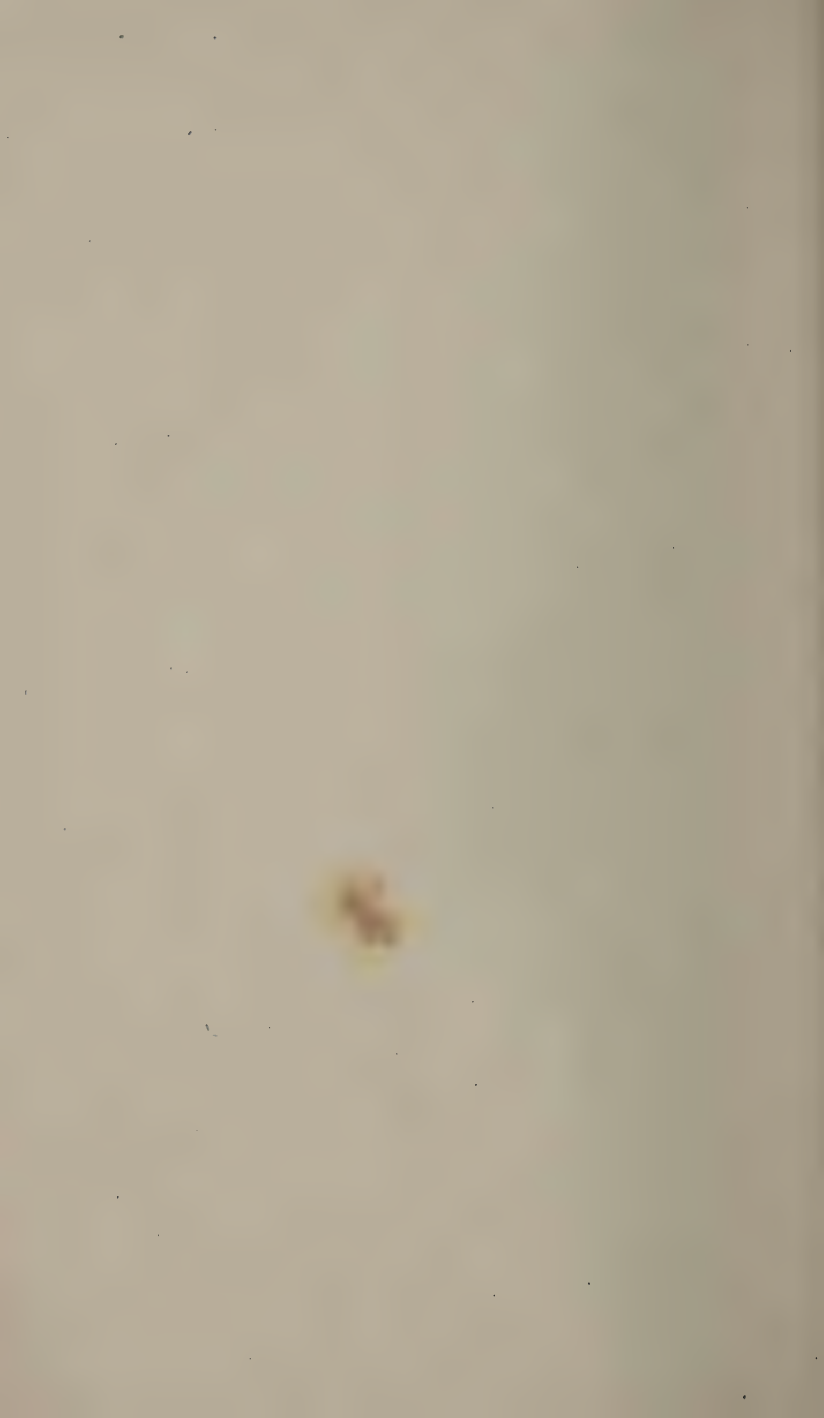

Parents, you cannot too dearly estimate the intellectual and moral training of your children. They are your's to educate, your's to train for immortality. The free school is a gift of the people. A good education is the birthright of every American citizen. Let us elevate it to its proper place, then shall we elevate the people, and march forward to a noble and exalted manhood. Respectfully submitted,

N. C. LATHROP,

S. S. Committee.
